Venture Name

Working name or one line description of the scientific finding you want to commercialize

Relation to a University or Knowledge Institute

Is your proposal originating from or related to a University or Knowledge Institute? If yes, which University/Institute?

What's your venture about?

What is the underlying science/technology and how is this protected (patented)?

Can it be commercially offered as a new **product** or as a new **service**?

Is it a new technology that would **improve performance** or **reduce costs** of an existing process?

Or is it a **new process** that enables activities that could not be done before?

Don't dwell on technical details, but explain clearly who you see as customers that would benefit from your product/service and what difference it would make to them? (*maximum 30 lines*)

How big is your market?

Please provide a rough estimate of the market for your product/service.

For example, if your idea is about a new product/service, how many customers (i.e. businesses or consumers) might want it, how much would they be willing to spend on it, and what percentage would be spent with your Venture? Don't worry if you do not have all the numbers: that's normal at this stage.

Or, if your idea is about cost savings, how much time, money or resources would your technology/process save your customers?

Is your product/service unique?

Coming up with a unique product/service is often the key to commercial success. Offering the same as your competitors will not give you the best financial return.

Describe here how your offering differs from other products/services currently on the market (e.g., does it address an unfulfilled customer need?) or processes/technologies currently used by competitors (e.g., is it faster?).

Impact on animal use?

Tell us how your venture impacts the use of animals in science. Think about what tests could be replaced, which type of animal, how many?

Why you?

Tell us why you think your team and your organization is the right entity to take this idea forward successfully.

Think about skills, know-how, patents, assets, relationships, customer bases, etc. Would these give your venture an advantage over competitors? Also think about what you're missing to become successful.

Please note that your team consists of min. 3 persons and are all available at the following dates:

Interviews	<i>2 and 4 February 2022</i>
Workshop I	<i>February 16-18 2022</i>
Workshop II	<i>April 6-8 2022</i>
Finals	<i>April 22nd 2022</i>
<u>Announcement of the winner</u>	<i>Proefdiervrij Event, 22 april 2022</i>

Availability intake interview

If your Venture Proposal looks promising, your team will be invited for an intake interview. The one hour interviews will take place on Wednesday 2 February or Friday 4 February 2022. Please indicate your availability below by checking the appropriate box.

Date	Time	Yes	No
Wednesday 2 February	9:00		
Wednesday 2 February	10:00		
Wednesday 2 February	11:00		
Wednesday 2 February	12:00		
Wednesday 2 February	13:00		
Wednesday 2 February	14:00		
Wednesday 2 February	15:00		
Wednesday 2 February	16:00		
Wednesday 2 February	17:00		
Friday 4 February	9:00		
Friday 4 February	10:00		
Friday 4 February	11:00		
Friday 4 February	12:00		
Friday 4 February	13:00		
Friday 4 February	14:00		
Friday 4 February	15:00		
Friday 4 February	16:00		
Friday 4 February	17:00		

Application Requirements

A Proefdiervrij Venture Challenge application can be submitted if:

- The team consists of a minimum of 3 and a maximum of 5 people.
- The team wants to market a new product, process or service based on a new technical invention or a new application of pre-existing technology, arising from scientific research. This must fall within the aforementioned scope.
- The team is prepared to cooperate in communication from Proefdiervrij. We take any sensitive/secret information into account: the emphasis in the communication lies on the motivation to participate, why animal-free research is so important, the expected effects on the use of laboratory animals, etc.
- When the idea includes setting up a company, this must be focused on countries within the EU that have a clear connection with the Netherlands (a Dutch founder for example)
- If the application is made by a start-up, the start-up cannot be older than 5 years.

The start-up or team submitting this application meets the conditions for application stated above:

Yes

Signature

By submitting this application to aan@proefdiervrij.nl, I declare that I have this form truthfully and that I agree to the conditions of the Proefdiervrij Venture Challenge as published on the website of Proefdiervrij (www.proefdiervrij.nl) .
