Checklist Pilot Project

Version 2024

Proefdiervrij has budget available for pilot projects. These are small projects, that are set up to gather initial data for new ideas. The result of pilot projects should provide a starting point for applying for larger funding programmes. Proefdiervrij provides a maximum of 5.000 euros per project. Applications can be sent in as long as the budget available for the call is not exhausted.

Title of Project:

Name Head Applicant:

Emailaddress:

Address Main Applicant:

Provide a short description of the proposed project:

The research is both 100% free of laboratory animals and does not involve animals in any other way. This means that we do not co-fund projects that use slaughterhouse material or animal species falling outside the definition of the Animal Experiments Act (Wet op de Dierproeven).

Yes   No

Is Fetal Calf Serum used in this project?   Are other animal derived products used? (matrigel, antibodies, etc.?)
                                                   if so, which ones:

Yes   No

If so, are there animal free options available and would you be willing to use/explore them:

I am willing to participate in communication activities of Proefdiervrij (social media, newsletter, website, magazine, etc.)

Yes   No

What is the potential impact on the use of animals of this project? Describe how animals are replaced, which animals and give an estimate of the number of animals.

Why is it necessary to set up this pilot project:

After the pilot project is completed, what would be the next step. How is this project going to help you in the future:

Requested budget:

Justification of project budget:

Signature
By submitting this application to Proefdiervrij, I declare that I have this form truthfully and that I agree to the funding conditions as described in this checklist.
